Dear Patients, Friends & Neighbors

August, 2015

Please note the changes in my schedule: Woodville Office—Tues. & Thurs. 1-6pm & Most Saturdays 10-1pm. Fremont Office—All other days with no set hours. Just call or text 419-332-7666. (If no answer I will call back).

With schools opening soon parents are being told (threatened in some cases) that their child will not be allowed to attend unless vaccinated. **NOT TRUE!** Exemptions still apply in Ohio & most states. Note that ANY previous reaction to vaccines, or sensitivity to any ingredient calls for a medical exemption, religious & philosophical reasons also apply. And are you aware of the ingredients? SCARY! Get educated **before** you vaccinate. After may be to late. **Sources: NVIC** (<http://www.nvic.org/>) **VAERS: Vaccine Adverse Event Reporting System HPV Gardasil Victims (if considering HPV shots)** Did you know a vaccinated person is contagious after the vaccination for a time. Its called shedding. And did you know most of the measles cases at *Disney* were already vaccinated for measles. Guess that worked? **Visit us at one of the Fremont farm markets. Hope to see you there. Dr Lon Nitschke**

**An example of vaccine “research”
Based on this kind of research vaccinations are considered safe. Please protect your children – refuse to let vaccine toxins be injected into their bodies.**

The vaccines do not work (protect) and they cause terrible damage. There is no benefit. Every state has exemptions permitting a child to go to school if they have no shots – use them. It’s not supposed to happen this way but dangerous vaccines receive government approval. For example, the Food and Drug Administration (FDA) approved GlaxoSmithKline's (GSK) Pediarix® 5-in-1 vaccine for diphtheria, tetanus, whooping cough, hepatitis B and polio based on GSK’s claim that their vaccine was safe and caused “no ... serious adverse events to any child.” Don’t FDA reviewers read the research? In the GSK research two children withdrew from the study because of serious adverse events, one child developed seizures, one had a brain tumor after the first immunization, four got bronchiolitis/pneumonia, one got meningitis and one had apnea.

GSK said these reactions were “unrelated.” Sherri Tenpenny, DO asks: “Why is it that whenever an adverse event occurs during the course of a vaccine clinical trial it is never related to vaccination?” In addition, Pediarix® contains formaldehyde, 2-Phenoxyethanol (antifreeze), mercury, monkey cells, neomycin, polysorbate 80, yeast protein and other dangerous chemicals also found in other childhood vaccines. The FDA approved Pediarix®. Is it any wonder the FDA has been called corrupt by many researchers? (7) ...

What Our Patients Say:

BEFORE: Dr. Nitschke is an amazing clinician. I was suffering with nausea and vomiting for 15 years, so intense that I was using a medication designed for chemo therapy patients without result, and have undergone several surgeries to correct the problem. At my initial visit, Dr. Nitschke determined that I was sensitive to many foods as well as having increased levels of formaldehyde in my system from years of consuming diet colas to help relieve the nausea. Many of you may remember your parents giving you Coca-Cola syrup as a remedy for nausea; diet colas became my medication of choice. I was also suffering from 20 years of insomnia and nightmares. The medication that I was taking for the insomnia wasn't helping and when I was able to fall asleep, the nightmares began.

AFTER: After eliminating the foods that I was sensitive to from my diet, using an herbal remedy suggested by Nitschke to aid with digestion and support my immune system, decrease my consumption of diet colas, and add more whole foods to my menu plan, I have completely eliminated the need for the chemo therapy medication, the medication for sleep, and am now sleeping four-to-six hours of collective sleep each night and am free of nausea. What a blessing on so many levels! To say that Dr. Nitschke is an excellent physician with phenomenal diagnostic skills is an understatement as he is also a kind, sensitive and wonderful person. I am very grateful for him as I feel as though my overall wellness has increased significantly as result of his care.

Susan Perry

Our Mission Statement

To assist everyone & anyone desiring optimum health through natural and alternative health care, to avoid the negative side-effects of drug prescriptions and surgery.

HUMOR

One day, in line at the company cafeteria, Joe says to Mike behind him, "My elbow hurts like hell. I guess I'd better see a doctor." "Listen, you don't have to spend that kind of money," Mike replies..."There's a diagnostic computer down at Costco. Just give it a urine sample and the computer will tell you what's wrong and what to do about it. It takes ten seconds and costs ten dollars - A lot cheaper than a doctor." So, Joe deposits a urine sample in a small jar and takes it to Costco. He deposits ten dollars and the computer lights up and asks for the urine sample....He pours the sample into the slot and waits. Ten seconds later, the computer ejects a printout: "You have tennis elbow. Soak your arm in warm water and avoid heavy activity. It will improve in two weeks. Thank you for shopping @ Costco.." That evening, while thinking how amazing this new technology was, Joe began wondering if the computer could be fooled. He mixed some tap water, a stool sample from his dog, urine samples from his wife and daughter, and a sperm sample from himself for good measure. Joe hurries back to Costco, eager to check the results. He deposits ten dollars, pours in his concoction, and awaits the results. The computer prints the following:

1. Your tap water is too hard. Get a water softener. (Aisle 9)
2. Your dog has ringworm. Bathe him with anti-fungal shampoo. (Aisle 7)
3. Your daughter has a cocaine habit. Get her into rehab.
4. Your wife is pregnant. Twins. They aren't yours. Get a lawyer.
5. If you don't stop playing with yourself, your elbow will never get better!

Did you know?

John Pemberton (1831-1888), a pharmacist, was shot and slashed in the US Civil War. He began using morphine to ease his pain. Trying to find an alternative painkiller using coca leaves and kola nuts, he created a drink that later became Coca-Cola.

California blew it: SB277

All the other states were able to deep 6 all the bills to remove vaccine exemptions. But not California; SB277 passed. The people fighting the bill were weak: "We're not anti-vaccine, vaccines save lives, we're not against them. But pretty please let us refuse them sometimes, if that's OK with you."

Why didn't they flat out tell the truth:

Vaccines are dangerous; they kill infants and babies. The US government has paid nearly \$3billion compensation for vaccine injuries including brain damage, weakened immune systems and chronic illness. Further they are ineffective and there's no science behind them. You want us to be forced to take them? Are you crazy? What is this Nazi Germany? Stalinist Russia? North Korea?

Then bring a few brain-injured, autistic kids in front of the legislature and the cameras. Get some that are out of control and scream non-stop and have seizures and then with a megaphone (because they can scream loud) say, "You want to force us to have more of this?"

Why doesn't anyone have the nerve to say they are anti-vaccine? We're dealing with fanatics who want to poison all kids – no exceptions.

In my state of PA the bill was tabled. I met with two state reps who were as knowledgeable about vaccines as most MDs – meaning they knew nothing!

But they listened because I told them: "There are thousands of voters in your district that want freedom of choice." If it were just me they wouldn't give a damn. "Constitutional rights? What Constitutional rights?" but say "Thousands of voters," Now they are listening.

Researching Chiropractic

There seems to be no end to the conditions that respond to chiropractic care - physical as well as psychological conditions. That is because chiropractic does not "treat" a particular condition. Chiropractic care "treats" or more accurately, "corrects" a serious interference to brain, nervous system and energy function known as the subluxation.

No matter what condition you or a loved one may have, you and they will always function better when free from subluxations. Chiropractors are uniquely trained to locate and correct subluxations. Enjoy this month's cases and see more next month.

Multiple sclerosis and Parkinson's disease

This study reviewed data from 81 Multiple Sclerosis (MS) and Parkinson's Disease (PD) patients, most of whom recalled having a trauma in the past before getting their diagnosis. The time between the traumatic event and getting the disease varied from two months to 30 years!

Over a five year period the author examined and cared for these patients. Of the 81, 78 recalled that they had experienced at least one head or neck trauma prior to the onset of their disease:

- 39 patients had been hurt in auto accidents;
- 29 had been hurt in sporting accidents (i.e. skiing, horseback riding, cycling and football)

16 had been hurt in falls on icy sidewalks or down stairs

Upper cervical (neck) subluxations were found in all 81 cases and all received upper cervical (upper neck) chiropractic care for correction of their vertebral subluxations.

The results were as follows: 40 of the 44 (91%) MS patients and 34 of the 37 (92%) PD patients showed symptomatic improvement and no further disease progression while they were under care. (4)

Asthma in an 18-month-old

An 18-month-old baby began experiencing asthmatic symptoms at age 9 months. His history included having been rushed to the hospital emergency room 4 times for episodes of acute respiratory distress. He suffered from constant wheezing and cough and was not responding well to pharmacological (prescription) interventions.

The boy was seen six times over a 7-month period for correction of vertebral subluxations. He received adjustments to his cervical spine (neck) during his visits. By 9 weeks of care he was not experiencing constant wheezing or having any breathing difficulty at all.

In addition, analysis revealed that his vertebral subluxations had been reduced. (5)
